Basic Pager Operation

2. Basic Operation

● Changing Alert Mode

From sound to vibration, press Function Key. The back light comes on. Then press Function Key again. "Tone Off?" is displayed.

Press Function Key to confirm. The pager will beep to confirm change.

From vibration to sound, repeat the procedure above. Look for the speaker symbol to appear.

Basic Pager Operation

● Reading Message

When a message is received, the pager alerts the user via sound alert for 15 sec or vibration for 6sec. and "Page" is displayed. Press Read Key to read the message.

If the pager has 16 Messages, "Page Full" is displayed.

If the pager has no message, "No page" is displayed.

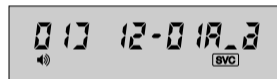

Basic Pager Operation

In case the pager has over 16 messages, it erases the oldest one to make room for the newest one.

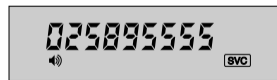

To read a message in memory, do the following:

Press Read Key. This displays when the 1st message was received.

017 is the sequence of the message in memory.
3 (the last alphabet) means message address.

Press Read Key again to read your message.
The most recent page is displayed first.

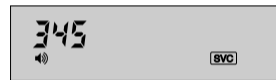

Basic Pager Operation

If the message continues to next page, the icon  is displayed.

Press the Ready Key again to read the continued message.

Basic Pager Operation

Erasing a Message

If you want to erase the message you are reading, press Function Key. Back light comes on. Then press Function Key again.

Pager will ask you to confirm.

Press Function Key to confirm. If not, press Read Key to cancel.
